

METAL BASE

OHM/002/004

- Can be installed invisibly for a clean finish
- Ideal for installations in residential properties
- Easy installation

Unlike traditional concrete bases, this metal base allows your charging station to be installed quickly, efficiently and securely. This base must be placed in a dug pit and then secured with quick-setting concrete. The necessary installation materials are included as standard (8 bolts, 8 washers and 4 plastic caps to cover them).
